2. Rules game:

    a) Main rules

    The goal of game is put all the boxes in marked places. The worker can go through the
    floor or marked area. If on the way of worker is box, than he can push the box in the
    same direction as player move, if and only if behind the box is empty or marked space.

    b) Movement

    The worker can go up, down, on left, or on right. To moving the worker, touch the
    screen and slide in one of four direction. If the move is possible, than the worker go in
    this direction, else nothing will happened.

    c) Ending and restart the game

    When the last box will take it own place, than the game will be finished. Than the info
    about win will be display. If user do mistake and will be in position, which have no
    solve, than he can restart the game, by click on the reset button.
